DIRECTIONS FOR USE

USE ONLY AS DIRECTED

RATE OF APPLICATION

- Application rate range is dependent on surface area irrigated - an average full surface rate of application is 10 ℓ/ha.
- *Application rate on hydrophobic soils is very dependent on the severity of the hydrophobicity and the rate needs to be adapted as required.

METHOD OF APPLICATION

- ORO-SOIL™** should be applied through irrigation to the soil.
- If applied as a spray application to the soil surface, use a high-water volume and irrigate directly after spraying

APPLICATION TIMING

- One application per season is required.
- ORO-SOIL™** should be applied early in the season to ensure the benefit throughout the entire season.
- As the soil dries out during the season an application can be made as required.

For recommendations under particular soil conditions contact your Agent or contact Oro Agri directly.
